Subject: Application for an IT Support Technician Position

Dear Hiring Manager,

I am writing to express my interest in an IT Support Technician position within your organization. I have an academic background in Information and Communication Technology (Application Development) at Durban University of Technology and practical experience assisting customers with everyday computer and technical support needs.

From October 2024 to January 2025, I worked as a Technical Support Assistant at Albert Park Internet Café. My responsibilities included assisting customers with computer use, providing typing, printing and scanning services, helping troubleshoot basic computer and internet connectivity problems, and handling payments for services. This experience strengthened my customer service, communication and problem-solving skills while teaching me the importance of patience and reliable technical assistance.

My ICT studies have also introduced me to programming, databases, networking fundamentals, computer systems and cloud technologies. Through Cisco Networking Academy and other technical learning activities, I have continued developing my understanding of networking devices, network fundamentals, cybersecurity and troubleshooting concepts.

I am eager to apply my existing skills, learn from experienced IT professionals, and grow within a technical support environment. I believe my combination of customer-facing experience, technical foundations and willingness to learn would allow me to make a positive contribution to your team.

Thank you for considering my application. I welcome the opportunity to discuss how my background and enthusiasm for IT support could benefit your organization.

Yours sincerely,
Lizalise Hlangani
