**Subject: Application for a Junior Network Support Technician Position**

Dear Hiring Manager,

I am writing to apply for a Junior Network Support Technician position within your organization. My academic background in Information and Communication Technology at Durban University of Technology, combined with my practical technical support experience and ongoing networking studies, has motivated me to pursue a career in network support and infrastructure.

From October 2024 to January 2025, I worked as a Technical Support Assistant at Albert Park Internet Café. I assisted customers with computer use, provided typing, printing and scanning services, and helped troubleshoot basic computer and internet connectivity problems. This experience helped me develop practical problem-solving, communication and customer service skills.

Through my ICT studies and Cisco Networking Academy learning, I have developed foundational knowledge of networking devices, network fundamentals, introductory network configuration and cybersecurity concepts. I have also used Cisco Packet Tracer for networking practice and am keen to continue building my hands-on skills in network troubleshooting and administration.

I am seeking an opportunity where I can contribute my technical foundation, willingness to learn and commitment to reliable IT services while gaining further practical experience. I would welcome the opportunity to support your team and grow into a capable network support professional.

Thank you for considering my application. I look forward to the opportunity to discuss my suitability for the position.

Yours sincerely,
**Lizalise Hlangani**
